

ABSTRACT OF THE DISCLOSURE

A monocular video/audio display system which is easily attachable to and detachable from a baseball cap visor or hat brim by means of a spring clip
5 attached to the upper portion of a casing. An arm pivotally attached to the casing lower portion is attached to an optics assembly having a housing containing a display and backlight assembly. The optics assembly also includes a focus mechanism assembly and an eyecup. The housing is attached to a gimbal which is pivotable about the arm. The arm and gimbal pivot parallel to
10 a reference plane determined by the interface between the casing upper and lower portions. The casing houses a circuit board including wireless receiver circuitry and a fractal antenna.
